NBM HAS SHEET & PLATE

THE LEADING USA MANUFACTURER & MASTER DISTRIBUTOR OF BRASS, BRONZE, & COPPER ALLOYS

NBM HAS SHEET & PLATE READY FOR IMMEDIATE SHIPMENT!!!

NBM is excited to announce the addition of significantly large inventories in brass, bronze, and copper alloy sheet and plate. The new inventory has been accompanied by the installation of a new state-of-the-art plate saw to service cut to size orders.

- C10100 Oxygen Free Copper
- C11000 ETP Copper
- C18150 Copper Chromium Zirconium
- C18200 Chromium Copper
- C26000 Cartridge Brass
- C46400 Naval Brass
- C61400 Aluminum Bronze
- C63000 Nickel Aluminum Bronze
- C65500 Silicon Bronze

* Additional alloys are currently under consideration

NBM HAS SHEET & PLATE

THE LEADING USA MANUFACTURER & MASTER DISTRIBUTOR OF BRASS, BRONZE, & COPPER ALLOYS

C10100 Oxygen Free Copper

Extra high conductivity for electrical switch gear, circuit breaker, and resistance welding products. As well as, sliding contacts and heat-transfer related products.

C11000 ETP Copper

High conductivity for electrical switch gear, bus bar, ground straps, electrolytic tank heads, pole line hardware, circuit breakers, power distribution centers (PDC's), elbows or returns for cooling modules (Electric Arc Furnaces), Graphite Electrode Holders (Electric Arc Furnaces), and heavy duty electrical connectors.

C18150 Copper Chromium Zirconium

Special electrodes for wire mesh welding, electrodes, cap tips, and wheels on plated or pre-finished metals to avoid sticking and mushrooming problems occurring on standard class II RWMA applications. Also, electrical distribution for commercial buildings.

C18200 Chromium Copper

Special electrodes for wire mesh welding, electrodes, cap tips, and wheels on plated or pre-finished metals for standard class II RWMA applications. Also, electrical distribution for commercial buildings.

C26000 Cartridge Brass

Electrical connectors, thermostats, fasteners, decorative hardware, kick plates, printing stencils, and washers.

C46400 Naval Brass

Exhibits guaranteed performance and exceptional cost-efficiency in wear plate applications. This versatile material is a non-abrasive, long-wearing surface is ready for drilling, grooving and fast installation. This is the ideal plate material for your marine/industrial naval brass needs. Other applications include heat exchangers, decorative fittings, and plumbing fittings.

C61400 Aluminum Bronze

Excellent corrosion resistance used in fittings, fasteners, nuts, bolts, tie rods, ball sockets, and heat exchange components, as well as, plastic injection molding dies.

C63000 Nickel Aluminum Bronze

High strength alloy in many cases the strength of steel plus superior corrosion resistance. Outstanding wear and galling resistance. Used in marine and propeller hubs for shipboard equipment. Pump columns, aircraft bearings, wear plates, flanges and wear rings.

C65500 Silicon Bronze

Used for the fabrication of industrial hot-water heater and storage tanks and equipment used in the process industries. Its combination of corrosion resistance, strength, resilience, formability and weldability make it one of the most widely used copper alloys.
